

CALL FOR PAPERS

WRITE A PAPER FOR THE INTERNATIONAL CONFERENCE

“CARBON MARKET: INTERNATIONAL EXPERIENCE AND RECOMMENDATIONS FOR VIET NAM”

Carbon markets are seen as one of the solutions to cut greenhouse gas emissions applied by entities around the world. Currently, Viet Nam is in the process of desiring sustainable economic development and at the same time complying with the commitment to achieve Net Zero by 2050, so reducing emissions in a closed view and moving towards building a carbon market is an urgent requirement. The Law on Environmental Protection 2020 and Decree 06/2022/ND-CP have set out a roadmap for piloting a carbon market in Viet Nam from 2025. To collect opinions from experts and scientists on issues arising when building a carbon market in Viet Nam, the Organizing Committee held a workshop:
